

Our Holiday Rental «Green Suggestions»

We love our home and the Zahora area and we hope you'll come to love it as well. To preserve the local environment we have some simple suggestions, which if followed help consume less energy and preserve the environment.

- Use the provided bins for recycling of garbage. There is a collection point approx. 200 meters to the right when leaving the property, on the way to the beach 😊 Residual garbage can be dropped there as well or approx. 20 meters to the left when leaving the property.
- Make sure to collect all garbage when leaving the beach
- Wash your clothes at a max. of 40 degrees, use a short/half program when possible
- Fill up the dishwasher before you switch it on
- Only use the AC when needed, the system is well-dimensioned and reaches the desired temperature quickly
- Turn lights off when you leave a room
